

(5) Specific rules relating to response station hubs, booster stations, and 125 kHz channels are set forth in §§ 21.909, 21.913, 21.949, 74.939, 74.949 and 74.985. To the extent those specific rules are inconsistent with any rules set forth above, those specific rules shall control.

(c) Existing licensees and prospective applicants, including those who lease or propose to lease excess capacity pursuant to § 74.931(c) or (d), are expected to cooperate fully and in good faith in attempting to resolve problems of potential interference before bringing the matter to the attention of the Commission.

(d) Each authorized or previously-proposed applicant, or licensee must be protected from harmful electrical interference at each of its receive sites registered previously as of September 17, 1998, and within a protected service area as defined at § 21.902(d) of this chapter and in accordance with the reference receive antenna characteristics specified at § 21.902(f) of this chapter. An ITFS entity which did not receive protected service area protection prior to September 17, 1998 shall be accorded such protection by a cochannel or adjacent channel applicant for a new station or station modification, including a booster station, response station or response station hub, where the applicant is required to prepare an analysis, study or demonstration of the potential for harmful interference. An ITFS entity receiving interference protection provided by this section will continue to receive such protection if it elects to swap channels with another ITFS or MDS station as specified in § 74.902(f).

#### § 74.911 Processing of ITFS station applications.

(a) Applications for ITFS stations are divided into three groups:

(1) In the first group are applications for new stations. These applications are subject to the provisions of paragraph (c) of this section.

(2) In the second group are applications for major changes in the facilities of authorized stations. A major change for an ITFS station will be any proposal to add new channels, change from one channel (or channel group) to another, except as provided for in § 74.902(f), change polarization, increase the EIRP in any direction by more than 1.5 dB, increase the transmitting antenna height by 25 feet or more, or relocate a facility's transmitter site by 10 miles or more. Major change applications are subject to paragraphs (d) and (e) of this section.

(3) The third group consists of applications for all other licenses and all other changes in the facilities of authorized stations.
